Acclaim X-Stick highlights Home Theatre Media Center Cove Lighting application

A small but effective recent installation shows how the X-Stick is ideal for Cove Lighting applications.

The X-Stick-PCB was chosen for its output and built in programs allowing the Master unit to run an auto program offering a slow fade through the color spectrum. Installation of the Media Center was provide by IVC. 1 X-Stick Master PCB and 3 X-Stick Slave PCB with programming via the XBR1 and a small 24v psu were all that were needed to complete the installation.

Below are some sample photo's of the installation and more information on X-Stick Series can be found on our web site at www.acclaimlighting.com or contact info@acclaimlighting.com
