1. Safety Instruction

Please read the instructions carefully which includes important information about the installation, operation and maintenance.

WARNING

Please keep this User Guide for future consultation. If you sell the unit to another user, be sure that they also receive this instruction booklet.

Caution:

- All fixtures are intact from the manufacturer, please operate follow up the user manual, artificial fault are not under guarantee repair.
- Unpack and check carefully there is no transportation damage before using the unit.
- This product is suitable for indoor use and wet locations. Do not immerse in water.
- DO install and operate by operator.
- Use safety chain when fixes the unit.
- The unit must be installed in a location with adequate ventilation, at least 50cm from adjacent surfaces.
- Be sure that no ventilation slots are blocked, otherwise the unit will be overheated.
- Before operating, ensure that the voltage and frequency of power supply match the power requirements of the unit.
- It's important to ground the yellow/green conductor to earth in order to avoid electric shock.
- Maximum ambient temperature T_a : 40°C . Don't operate it where the temperature is higher than this.
- DO NOT connect the device to any dimmer pack.
- First run, there will be smoke or smells, and all disappearing a few minutes later.
- Make sure there are no flammable materials close to the unit while operating, as it is fire hazard.
- Look over power wires carefully, replace immediately if there is any damage.
- Unit surface temperature may reach up to 60°C . DO NOT touch the housing bare-hand during its operation.
- Never run on for a long time lest shortening lifespan.

- Avoid any inflammable liquids, water or metal objects entering the unit. Once it happen, cut off the mains power immediately.

Select the **Shnd**, press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to select the **Sh01** (Show 1) or **Sh02** (Show 2)....**Sh16** (Show 16) Mode. Once selected, press the **ENTER** button to setup. Press the **ENTER** button, **F000** will blink on the display, use **DOWN** and **UP** button adjust the fade time (0~255); press the **ENTER** button to store and **U000** will blink on the display, use the **DOWN** and **UP** button adjust the wait time (0~255), press the **ENTER** button to store or automatically return to the main functions without any change after one minute. To go back to the previous functions without any change press the **MENU** button.

dnst

Select the **dnst**, press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to select the **nasl** (MASTER-SLAVE: If the DMX signal is lost or power is applied, the unit will automatically go into Master Slave mode) or **blnd** (BLACKOUT: If the DMX signal is lost or power is applied, the unit will automatically go into standby mode.) or **last** (LAST STATE: If the DMX signal is lost the fixture will stay in the last DMX set up. If power is applied and this mode is set, the unit will automatically go into the last DMX set up.). Once selected, press the **ENTER** button to setup or automatically exit menu mode without any change after one minute. To go back to the functions without any change press the **MENU** button.

Manual Mode

Select the **MANU**, press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to select the **RED** (Red), **GREEN** (Green), **BLUE** (Blue), **WHITE** (White) or **DIMM** (Dimmer). Once selected, press the **ENTER** button to confirm, and use the **DOWN** and **UP** button to adjust the value between **0000** and **255**, then press the **ENTER** button to store, or automatically exit menu mode without any change after one minute. To go back to the functions without any change press the **MENU** button.

White Balance

Select the **BALA**, press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to select the **RED** (Red), **GREEN** (Green), **BLUE** (Blue) or **WHITE** (White). Once selected, press the **ENTER** button to confirm, and use the **DOWN** and **UP** button to adjust the value between **125** and **255**, then press the **ENTER** button to store, or automatically return to the main functions without any change after one minute. To go back to the previous functions without any change press the **MENU** button.

Photo Cell

Select the **PECL**, press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to select the **YES** (Be controlled by sunlight) or **NO** (Not be controlled by sunlight), Once select, press the **ENTER** button to setup or automatically return to the main functions without any change after one minute. Back to the previous functions press the **MENU** button.

Photo Cell Intensity

Select the **SENS**, press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to adjust the intensity value between **000** and **100**. Once selected, press the **ENTER** button to setup or automatically return to the main functions without any change after one minute. Back to the previous functions press the **MENU** button.

Time Setup

Press the MENU button to show  on the display. Press the **ENTER** button will show the hour. Press the **ENTER** and use the **DOWN** and **UP** button to select the  (0 hour) ...  (10 hours) mode, press the **ENTER** again and use the **DOWN** and **UP** button to select the  (10 minutes),  (20 minutes) ...  (50 minutes). Once select, press the **ENTER** button to setup or automatically return to the main functions without any change after one minute. Back to the previous functions press the **MENU** button.

Password

Press the MENU button to show  on the display. Press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to change the password from the  ... . Once select, press the **ENTER** button to setup or automatically return to the main functions without any change after one minute. Back to the previous functions press the **MENU** button.

Keyboard Lock

Press the **MENU** button up to when the  is showing on the display. Press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to select the  (lock the key board) or  (normal), Once select, press the **ENTER** button to setup or automatically return to the main functions without any change after one minute. Back to the previous functions press the **MENU** button.

Display Inversion

Press the **MENU** button up to when the  is showing on the display. Press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to select the  (normal) or  (inverse), Once the mode has been selected, press the **ENTER** button to setup or automatically return to the main functions without any change after one minute. To go back to the previous functions without any change press the **MENU** button.

Auto Test

Press the **MENU** button up to when the **tEst** is blinking on the display. Press the **ENTER** button and the unit will run self-test by built-in program. To go back to the functions press the **MENU** button again.

LED Display

Press the **MENU** button up to when the **LEd** is shown on the display. Press the **ENTER** button and the display will blink. Use **DOWN** and **UP** button to select the **on** (display is always on) or **OFF** (display off 20 seconds after exit menu) mode. Once select, press the **ENTER** button to setup or exit menu mode without any change after one minute. Back to the functions without any change press **MENU** button again.

Fixture Temperature

Press the **MENU** button up to when the **tEnP** is blinking on the display. Press the **ENTER** button and the display will show the temperature of the unit. To go back to the functions press the **MENU** button again.

Fixture Hours

Press the **MENU** button up to when the **Fhrs** is blinking on the display. Press the **ENTER** button and the display will show the number of working hours of the unit. To go back to the functions press the **MENU** button.

Software Version

Press the **MENU** button up to when the **vEr** is blinking on the display. Press the **ENTER** button and the display will show the version of software of the unit. To go back to the functions press the **MENU** button again.

4. How To Control The Unit

You can operate the unit in three ways:

1. Master/slave built-in preprogram function (Wired DMX connection)
2. Easy controller - by (ADJ)VD-T controller
3. Universal DMX controller

4.1 POWER And DMX Connection

Dyna Flood XT XXXXK:

Dyna Flood XT XXXXK DMX // Dyna Flood XT RGB/RGBA/RGBW/DW // Dyna Flood XT QW:

Power Wiring

You can connect the bare-ended, IP66-rated AC power cable from the product to an IP66-rated power connector or IP66-rated junction box.

If using junction boxes, make sure to use IP66-rated conduit for surface installations.

DMX Linking (by the ACC-VD-T)

You may link the Dyna Flood XT XXXXK; Dyna Flood XT XXXXK DMX; Dyna Flood XT RGB/RGBA/RGBW/DW; Dyna Flood XT QW to a DMX controller using a standard DMX serial connection. If using other DMX products compatible with the Dyna Flood XT XXXXK; Dyna Flood XT XXXXK DMX; Dyna Flood XT RGB/RGBA/RGBW/DW; Dyna Flood XT QW, you can control each individually with a single DMX controller.

DMX Modes

The Dyna Flood XT XXXXK; Dyna Flood XT XXXXK DMX; Dyna Flood XT RGB/RGBA/RGBW/DW; Dyna Flood XT QW uses the standard DMX data connection for its all its DMX personalities.

Signal Wiring

To provide signal for the Dyna Flood XT XXXXK; Dyna Flood XT XXXXK DMX; Dyna Flood XT RGB/RGBA/RGBW/DW; Dyna Flood XT QW, you can connect the bare-ended, IP66-rated signal cable from the product to two IP66-rated signal connectors (DMX In/DMX Out) or use an IP66-rated junction box. In this case, make sure to use IP66-rated conduit.

Protocol Connectivity

The Dyna Flood XT XXXXX; Dyna Flood XT XXXXK DMX; Dyna Flood XT RGB/RGBA/RGBW/DW; Dyna Flood XT QW uses USITT DMX 512 protocol. The procedure below illustrates the recommended connection method.

DMX SIGNAL LINE CONNECTION

Note: The junction box is not waterproof, and not recommended for outdoor use.

4.2 DMX Controller

You can operate the unit by DMX controller:

No need to turn the unit off when you change the DMX address, as new DMX address setting will be affected at once. Every time you turn the unit on, it will show **ACCL** on the display. After that the unit will be ready to receive DMX signal or run the built in programs.

Use universal DMX controller to control the units, you have to set DMX address from 1 to 512 channel so that the units can receive DMX signal.

Long press the **MENU** button for 5s, and the **Addr** is showing on the display. Press the **ENTER** button and the display will blink. Use the **DOWN** and **UP** button to change the DMX512 address. Once the address has been selected, press and keep the **ENTER** button pressed up to when the display stops blinking or storing automatically 8 seconds later. To go back to the functions without any change press the **MENU** button again.

4.3 DMX512 Configuration

BW-363E XXXXK DXX:

Channel	Value	Function
1	000-255	DIMMER 0%-100%

BW-363E RGB DXX:

Channel	Value	Function
1	000-255	Red 0%-100%
2	000-255	Green 0%-100%
3	000-255	Blue 0%-100%

BW-363E RGBW DXX:

Channel	Value	Function
1	000-255	Red 0%-100%
2	000-255	Green 0%-100%
3	000-255	Blue 0%-100%
4	000-255	White 0%-100%

BW-363E DW DXX:

Channel	Value	Function
1	000-255	CT 2200K 0%-100%
2	000-255	CT 3500K 0%-100%
3	000-255	CT 6500K 0%-100%

BW-1210E QW DXX:

Channel	Value	Function
1	000-255	Red 0%-100%
2	000-255	Green 0%-100%
3	000-255	Blue 0%-100%
4	000-255	White 0%-100%

5. Troubleshooting

Following are a few common problems that may occur during operation. Here are some suggestions for easy troubleshooting:

Problem	Possible Cause	Action
The unit does not work, no light.	Incorrect power cable connection.	Check the connection of power.
	Incorrect mains voltage.	Measure the mains voltage on the main connector.
The unit does not respond properly to the DMX control.	Incorrect DMX cable connection.	Check DMX connectors and cables to see if link properly. Repair or replace damaged wires.
	Incorrect address assignment to the units.	Check the addresses of the units and the protocol settings.
	Unfinished data connection.	Insert a terminal plug in the output jack of the last unit of the connection.
	It has been set up an operating mode different from the DMX mode used.	Check the operating mode set up.
		Try to use another DMX controller.

6. Fixture Cleaning

The cleaning of internal must be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surrounding can cause greater accumulation of dirt on the fixture's optics.

- Clean with soft cloth using normal glass cleaning fluid.
- Always dry the parts carefully.
- Clean the external optics at least every 20 days. Clean the internal optics at least every 30/60 days.
