Flex 120™ is a low profile, exterior-rated linear LED strip that can be directly powered from AC mains dimmers to fit seamlessly with existing control systems and eliminate the need for external power supplies.

Fully sealed lengths are supplied from 1.64 feet (0.5m) up to 65 feet (20m). Open-ended Flex 120 strips are also available to allow multiple strips to be daisy-chained to a maximum overall length of 131' (40m). As an integral part of each installation, all Flex 120 strips must be mounted and protected within matching aluminum channels (two styles and three lengths available) with the option of matching diffusion lenses.

Numerous emitter choices are available, with white color temperatures from 2700K to 5000K as well as saturated red, green, blue or amber colors.

At a glance

Optics 	Direct ELV mains dimming 	Emitters <div> CCT whites </div> <div> Saturates </div>		
Power 120VAC 60Hz	Consumption 3.8W per foot 12.4W per meter	Output Up to 371 lumens per 1.64 feet (0.5m)	Temperature -40° F to 122° F -40° C to 50° C	Protection Ingress: IP66 Impact: IK08

Specifications

Emitters	2700K, 3000K, 3500K, 4000K, 5000K, Red, Green, Blue or Amber
Photometrics	Up to 371 lumens per 1.64' (0.5m) section, CRI >80 (see below)
Beam angle	160°
Lumen maintenance	L ₇₀ 50,000 hours (@ 25° C)
Strip length	Built to order: 1.64' (0.5m) minimum, 65.6' (20m) maximum
Maximum fixtures in series	Interconnect lengths up to 131' (40m) maximum
Operating voltage	120VAC
Power consumption	3.8W per foot, 12.4W per meter
Control	10-100% dimming via ELV (reverse phase/trailing edge) or sinewave dimming 0-10V or DMX control also available using optional UDM module
Connection	ETL-listed AC junction box with 10' (3m) feed cable (required)
Material	PVC, UV stabilized
Finish	Transparent sleeve, white PCB
Mounting	Via aluminum channel (required)
Operating temperature range	-40° F to 122° F (-40° C to 50° C)
Ingress protection	IP66, wet and dry location - not for use where water can accumulate. GFCI/RCD breaker required
Impact protection	IK08, protection against 5 joule impact (30cm distance)
Warranty	5 years, limited
Dimensions	See page 4
Certifications

Flex 120 strip lengths

Flex 120 strips are fully created and sealed at manufacture to ensure the integrity of the mains level power rails located within. Two styles of Flex 120 strip are available:

- **Terminated strips** - used in isolation or as the final item in a multi-strip chain, or
- **Open strips** - with input and output connections, these strips can be daisy-chained with others, up to a maximum length of 131' (40m).

Single Flex 120 terminated strip

Multiple Flex 120 strips (open and terminated)

For full installation details, please refer to the **user guide**, available for free download here:
