LUMENTENDER®

Cloud Based Lighting System Scheduling and Control Application

Overview

LUMENTENDER® is a cross-platform cloud-based solution for Scheduling, Control, and Management of supported* API-based, Internet Connected lighting control systems. The User Interface is specifically designed to allow Owners, Maintenance, and Administrative personnel the ability to manage their systems from any web connected device. The system requires a yearly or multi-year subscription. Proper Network Configuration by an ISP or other IT Personnel may also be required.

Order Codes and Variants

Order Code: LTS- A - B

LTS - (A) = (1-LITE, 2-PLUS, 3-PRO) - (B) = # of YR/s Subscription

LITE	PLUS	PRO	Feature Description
●	●	●	**Daily Event Module:** Create your typical **Daily** or **Weekly** schedule using our elegant, fluid user interface. Our Daily Event module empowers you to quickly, easily build your typical daily event schedule by day or range of days throughout your week based on Real-Time clock or Astronomical Events.
●	●	●	**Special Event Module:** Your special events are quickly and easily created in our Special Event module. Our **Occasion Library** is filled with National, Religious, and Charitable Holidays with recurring logic to assist with scheduling those pesky floating occasions every year.
	●	●	**Play Now™:** Select our **Play Now**™ module to view the actual images and videos of your lighting scenes and trigger them from any web connected device. (Customer responsible for photo & videography)
	●	●	**Instacolor Module:** Color your project instantly! Use our **Instacolor**™ **module** to effortlessly select groups of fixtures, change their color, hue or intensity, live or in the blind. Save and name your colors in your pallette for instant recall or use in our custom scene creator
		●	**Custom Lumescene™ Creator:** Create your own Custom Lumescenes™! Using our Custom Lumescene™ Creator module, choose your Lumegroups™, set your values and create your static scene. Name and save your favorite scenes for use in our Play Now™ module or in our Daily or Special event modules.
		●	**Lumescene™ Combo Creator:** Our Lumescene™ Combo Creator offers a simple yet powerful solution for multi-Site control. This module allows you to make combinations of Lumescenes™ within a single control system if using separate scenes for various zones, or link multiple controllers' (from across the City or across the World) similar scenes together. Once linked in a Lumescene™ Combo, that single item becomes available to the Daily & Special Event Scheduling and Play Now™ modules.
●	●	●	**Lumentender® Controls Support:** In App Chat Bot, Live, and Email Support. (On-Site and Remote Commissioning & Programming Services available through Lumentender Control Solutions, Inc. on an Hourly/Daily rate. Travel Terms may apply)
